Projets lauréats – *Granted Projects*

Liste par ordre alphabétique – List by alphabetical order

Nom <i>Name</i>	Prénom <i>First name</i>	Labo d'accueil <i>Host Lab</i>	Titre du projet <i>Title of the project</i>
BERNARD	Amélie	LBM	The missing link: how do membrane lipids instruct autophagy
BORD MAJEK	Isabelle	IMS	Innovative luminescent thin films based on high crystalline QDots InxGa1-xN (0?x?1) NANOparticles for efficient and robust ultra-miniaturized multi-wavelengths Light-emitting Sources
BOSCH-BOUJU	Clementine	NutriNeurO	OPTONUTRICS: a new tool to investigate the role of nutrients in brain function
BRASSELET	Etienne	LOMA	Matière active topologique pilotée par la lumière
CIACCAFAVA	Alexandre	CBMN	Activity and FunctiOning of REdox Membrane prOteins in native-like environment probed by new Spectroelectrochemical Techniques.
DEHAY	Benjamin	IMN	Development of NANovectors for lysosomal-based therapeutic strategies to combat PARKinson's disease
RIGAUD	Solange	PACEA	Out of the Core: Exploring social NETworks at the dawn of Agriculture in Western Asia 10 000 years ago
SALTEL	Frédéric	BarITOn	Transdisciplinary approach to decipher and model the impact of mechanical stress during hepatocellular carcinoma invasive tumor switch
STAMBOLIS- RUHSTORFER	Michael	CLIMAS	The Political Role of Experts and Scientists on Controversial Issues: European and U.S. Policymaking on Climate Change and LGBT Families
TOULLEC	Patrick	ISM	New environmentally-friendly and economically-effective route towards biologically-relevant chiral cyclic organic molecules
